Shraddha Nikumbh

Senior Frontend Engineer | React JS Developer

Nashik • +91-7387484684 • nikumbhshraddha05@gmail.com

PROFILE

Senior Front-End Engineer with 10.5 years of professional software engineering experience and 8.5 years specializing in frontend development, building scalable enterprise web applications across E-commerce, Healthcare, Insurance, and Banking domains. Strong expertise in React.js, JavaScript, TypeScript, Redux, React Query, GraphQL, REST APIs, Next.js, responsive UI, frontend architecture, and performance optimization. Experienced in developing reusable component architectures, modernizing UI platforms, optimizing rendering and application performance, implementing automated CI/CD pipelines, and delivering accessible, responsive interfaces. Strong background in Agile delivery, code reviews, technical mentoring, stakeholder collaboration, and team coordination.

SKILLS

Frontend	React.js • Next.js • JavaScript ES6+ • TypeScript • HTML5 • CSS3 • SCSS • Tailwind CSS
React Ecosystem	React Hooks • Redux • Redux Toolkit • Context API • React Query • React Router
Next.js	App Router • Routing • Metadata API • next/image • Loading/Error States • SEO Fundamentals
APIs & Data	GraphQL • REST APIs • Axios • Shopify APIs • React Query • AG Grid
UI & Design Systems	Material UI • Bootstrap • Tailwind CSS • Responsive Design • Reusable Components • Component-Based Architecture
Performance	Lazy Loading • Code Splitting • Memoization • Rendering Optimization • Virtualization • Responsive Performance
Testing & Quality	Jest • React Testing Library • Unit Testing • Pull Request Reviews • Accessibility (a11y) • Storybook
Build & Tooling	Vite • Webpack • Babel • npm • Git • GitHub • TFS
CI/CD & Cloud	GitHub Actions • Azure DevOps • Docker Basics • AWS Basics
CMS & E-Commerce	Shopify • Prismic • Optimizely
Enterprise Technologies	BizTalk Server • HL7 • XML • XSLT • SQL Server
Engineering Practices	Agile • SAFe • SDLC • Code Reviews • Technical Mentoring • Cross-Functional Collaboration

WORK EXPERIENCE

Jan 2026 – Sep 2026

Senior React Developer, Royal Enfield - Nagarro

E-commerce

Technologies: React.js, JavaScript, HTML5, Tailwind CSS, GitHub Actions, React Testing Library

- Owned new bike and variant launches, defining product-data flows and reusable React architecture.
- Improved initial-load and rendering performance by approximately 15% through lazy loading, code splitting, and memoization.
- Automated builds, tests, and deployments with GitHub Actions while maintaining at least 80% unit-test coverage.
- Reduced duplicate frontend development effort by designing reusable React component architecture supporting new bike and variant launches.
- Expanded responsive UI coverage across desktop, tablet, and mobile devices using Tailwind CSS.
- Reduced manual release effort by automating patch deployment workflows and product-asset update processes through custom scripting.
- Accelerated defect resolution through collaboration with stakeholders and QA across sprint planning, demos, testing, and production delivery.

Feb 2024 – Dec 2025

Senior React Developer, Snooze StoreFront - Nagarro

Technologies: React.js, JavaScript, GraphQL, Tailwind CSS, Prismic, Optimizely Experimentation's A/B Testing

- Configured A/B experiments in Optimizely to evaluate storefront UI variations and support data-driven optimization of e-commerce user experiences.
- Collaborated with the production monitoring team to review experiment performance and analyze results, supporting evidence-based decisions on storefront changes.
- Developed and integrated React UI variations using reusable components, ensuring consistent behavior and responsive layouts across tested storefront experiences.
- Implemented virtualization for large product listings, improving rendering performance and scroll smoothness by approximately 80%.
- Owned frontend delivery of the Wishlist feature from requirements analysis through implementation, QA, and production release, leveraging reusable product-card components.
- Integrated GraphQL product APIs with Prismic content to deliver dynamic storefront experiences and consistent product information.
- Conducted pull request reviews, mentored junior developers, and promoted reusable component patterns and frontend best practices.
- Collaborated with stakeholders, QA, and production monitoring teams throughout Agile delivery, experiment validation, defect resolution, and production releases.

Jul 2022 – Feb 2024

Senior React Developer, Access Care Rostering - Nagarro

Healthcare/Workforce

Technologies: React JS, TypeScript, React Query, Material UI, React Hook Form

- Built reusable UI components and page sections, reducing code duplication by approximately 70%.
- Integrated React Query and Axios into REST workflows to improve API data management.
- Automated Azure DevOps deployments, reducing manual release effort.

Jan 2021 – Jul 2022

React Developer, Accenture

ICDV Banking

Technologies: React JS, JavaScript, Redux, React Router, Material UI, AG Grid

- Built reusable React components and Hooks-based architecture to support scalable, maintainable banking applications.
- Integrated MSAL authentication, Redux, and React Router to enable secure access and consistent application workflows.
- Developed responsive AG Grid and Material UI screens with pagination, displaying 50 users per screen.

2016 – 2021

React Developer / Software Engineer — Enterprise Applications, Accenture & Syntel

Healthcare | Insurance | Banking

Projects: Global Reporting Hub (Insurance) | High Frequency Claims (Insurance) | Business Rule Manager (Healthcare) | HCA Facility Onboarding & Automation (Healthcare)

- Developed enterprise React applications using React.js, JavaScript, Redux, React Hooks, SCSS, Bootstrap and REST APIs.
- Built reusable components, state-management patterns, dynamic forms and API integrations for healthcare, insurance and reporting workflows.
- Implemented Jest + React Testing Library testing and supported defect analysis, troubleshooting and production releases.
- Collaborated with QA, stakeholders and distributed teams across Agile/SAFe delivery cycles.
- Earlier experience with BizTalk Server, HL7, XML/XSLT and SQL Server for healthcare integration and data transformation.

PERSONAL PROJECT

Present

Next.js Developer Portfolio - Learning Project

Link: https://shraddha-portfolio-teal.vercel.app/

Technology Stack: Next.js, App Router, JavaScript, Tailwind CSS, Vercel

- Built a responsive developer portfolio using Next.js App Router, showcasing professional experience, technical skills, projects, and career profile.
- Used Next.js features including App Router, dynamic routing, Metadata API, next/image, loading and error states, and SEO-friendly configuration.
- Structured the application using a component-based and reusable architecture for maintainability and scalability.

AWARDS

10.5 Years of Professional Software Engineering Experience with 8.5 Years Focused on Frontend Development

80% Minimum Unit-Test Coverage Maintained on the Royal Enfield Project Using Jest and React Testing Library

Multiple Client Appreciation Awards Received for Delivery Excellence

Individual and Team Recognition Received Through CARING Cheer Board Nominations

Multiple CI/CD Implementations Contributed Through GitHub Actions and Azure DevOps

Reusable Component Architecture Applied Across Multiple Enterprise React Applications to Improve Consistency and Maintainability

Technical Mentoring and Code-Review Contribution Provided to Junior Frontend Developers

Stakeholder-Facing Delivery Experience Including Sprint Demos, Showcases, Defect Resolution, and Agile Collaboration

---

COURSES

Present — **Microsoft PL-900 — Power Platform Fundamentals**

Present — **Microsoft AZ-900 — Azure Fundamentals**

EDUCATION

2012 – 2015 — **Bachelor of Engineering — Computer Science, Savitribai Phule Pune University**
